

ACKNOWLEDGEMENT

Without benefit of outside assistance from a professional consulting firm proficient in the environmental sciences, the Environmental Commission of the Borough of Brielle had to draw heavily upon the expertise of individual Commissioners in the compilation of this Natural Resource Inventory and Study (NRI).

Many other people also devoted valuable time and talent to this treatise, and we would like to acknowledge their contributions. Specifically, we wish to make note of the following individuals and groups, without whom this work would not have been possible.

The Union Landing Historical Society which, under the direction of Elizabeth Taylor, performed extensive research on the historical aspects of the community.

Craig Tufts for his contribution to the biocommunity and inventory works.

Terry Brown for work on selected portions of the bird inventory.

Richard Trimble and Richard Englert, and their classes at Manasquan High School, for the calculations necessary for the land use section of the Appendix.

Theodore Bell for his professional advice on varied matters pertaining to the NRI.

Elizabeth Murray, Anne Hanlon, Jean Hanlon and Mary Jane Scott for the long and arduous hours they provided the Commission with their typing talents.

Barbara Novick for her valuable assistance in mapping and

Ann Scott for her many and varied skills, particularly the inordinate number of hours donated to the mapping segment of this project.

To these and all the other persons who generously donated their time and talent, we are deeply indebted.
